RE: Attestation Statement Re LF500

To whom it may concern:

This letter is to attest to certain facts about the above-referenced device to the Federal Communications Commission ("FCC" or the "Commission"), at the Commission staff's request, with respect to the application of LiveFree Emergency Response, Inc. ("LiveFree") for certification of the above-numbered device.

As requested by the Commission staff, LiveFree hereby attests that the LF500 device is only capable of making (or receiving) phone calls from the emergency/GPS tracker call center, and is not capable of being used more generally as a mobile phone device. LiveFree further attests that only GPS coordinates and a very small set of additional data regarding characteristics of the user's environment (temperature, speed, etc.) is transmitted by the device over GPRS. LiveFree further attests that the intervals at which GPS coordinate reporting occurs are remotely controlled by the tracking information center, not the user, and that the most often that such reporting would occur is once every three minutes.

LiveFree further attests that the user's call to the emergency center will take place using the GSM function of the device, and only the GSM function or the GPRS function (but not both) will be used at any given time.

Should you need further information, please do not hesitate to contact us.

Best Wishes,

A handwritten signature in black ink, appearing to read "Joshua K. Chandler", is written over a light blue curved background element.

Joshua K. Chandler
President
LiveFree Emergency Response, Inc.
